

## Calcium Bentonite Clay Tips & Testimonials from Perry A~

Happy New Year. It's Perry A~ and I am back. Though we sold the Living Clay business in 2015, I have not retired from educating people to the plethora of uses of Calcium Bentonite Clay and answering their questions (512-773-0335 [perrya@perrya.com](mailto:perrya@perrya.com)) in an effort to understand this complicated natural substance. As I promised I will maintain the free clay information website [www.BentoniteClayInfo.com](http://www.BentoniteClayInfo.com). Since retiring from the webinars due to ongoing increasing expenses, I am picking up the slack by sending tips, articles, suggested protocols and new testimonials to share the magic of Bentonite Clay.

For a definitive guide to understanding and using clay I recommend my newest book *Calcium Bentonite Clay Nature's pathway to Healing – Balance, Detox, Stimulate, Alkalize*. You can order from [www.TheClayBook.com](http://www.TheClayBook.com) or [Amazon](http://Amazon.com).

Today's testimonial comes with photos of the healing process of a hydrochloric acid burn to the hand. The pictures and story tell it all.

### Hydrochloric Acid Burn to Hand

Worker's hand burned with Hydrochloric Acid. Doctors wanted to amputate part of his thumb and do a skin graft to the dark fleshy part between his thumb and forefinger.

He chose clay and soaked his hand in a thick clay mask for 13 hours the first time. Prior to the clay application he had intense severe burning pain and could not move his thumb. The next morning the pain was greatly reduced and he could wiggle his thumb. He kept doing poultices for 4 more days and the clay cleaned the wound and the dead skin started peeling off. He is in no pain can, move his thumb easily, and new healthy pink skin is now present and no amputation or transplant needed. – Robert H.

During Healing

After 4 days of clay applications.

Completely healed. – Robert H.
